

Chromosome Aneuploidies

Chromosome aneuploidies kits are systems on QF-PCR (Quantitative Fluorescence Polymerase Chain Reaction) for the rapid determination of the following aneuploidies: autosomal (13, 18, 21) and sex (X, Y) chromosomes; autosomal (15, 16, 22) chromosomes ; chromosome 15 uniparental disomy (UPD15)

Code	Name of kit	Technical specs	Amount of tests	Info	Additional info
mlg.anf.50	Anefast Multiplex QF-PCR	QF-PCR Kit	50	CE/IVD	Appl. Bios. & Beckman Coult.
AN.06FL	Miscarriages Aneuploidies QF-PCR Kits	QF-PCR Kit	50	CE/IVD	Appl. Bios. & Beckman Coult.
UD.01FL	UPD 15 KIT 1-FL	QF-PCR Kit	50	CE/IVD	Appl. Bios. & Beckman Coult.

Example of chromosome aneuploidies: triallelic trisomy & diallelic trisomy

Example of heterozygosity reduction in parents to homozygosity in the proband
